

Durable Ceramic SMD NTC Thermistor Varistor For Semiconductor Protecting

Our Product Introduction

Basic Information

- Place of Origin: Dongguan China
- Brand Name: linkun
- Certification: CE / ROHS / UL / TUV / SGS
- Model Number: SMD NTC Thermistor
- Minimum Order Quantity: Negotiation
- Price: Negotiation
- Packaging Details: Export Package / Negotiation
- Delivery Time: Negotiation
- Payment Terms: T/T, L/C, Western Union
- Supply Ability: 24 million per year

Product Specification

- Feature: Small Size
- Application: General Purpose, Electronic Product
- Accuracy: +/-1% ~5%
- Operating Temperature: -50-200 Degrees Celsius
- Resistance Tolerance: 10%-0.15%
- Operating Range: -50~200c
- Highlight: **Durable SMD NTC Thermistor,
Semiconductor Protecting SMD NTC Thermistor
, Small Ceramic SMD Varistor**

Product Description

High Reliability Ceramic Structure SMD Varistor Small Size For Semiconductor Protecting

SMD chip NTC thermistor has the characteristics of small size, high reliability ceramic structure, fast response, good heat cycle resistance, etc., and is widely used in lithium batteries, hybrid design multi-function modules, IT equipment, etc. Because the SMD chip NTC thermistor is suitable for leadless high-density surface mount, it plays the role of temperature monitoring and overheating protection in the following products:

Temperature monitoring of smartphones and tablets

In a smartphone or tablet, multiple SMD thermistors are used for temperature monitoring, and the basic circuit is a voltage divider circuit connected in series with NTC thermistors and fixed resistors. The resistance value of the NTC thermistor installed near the heat-generating parts such as the CPU and power module will decrease with the rise of temperature, so the output voltage of the voltage divider circuit will change, and the change will protect the circuit components after being sent to the microcontroller. Affected by overheating.

Specification

1. Professional Varistor supplier. SMD series
2. Wide parameter range for your choice.
3. High quality guaranteed ISO9001:2008 quality approve
4. Application: Electronic products, new products, new designs.
5. Technical support and professional recommendation

type	size L×W×T(mm)	R25 (kΩ)	B(25/50) (K)	allowable working current (25°C) (mA)	Thermal time constant

Product Uses

- 1.TCXO, Temperature compensating circuit of LCD
- 2.Temperature sensing in rechargeable batteries and chargers/CPU
- 3.IC and semiconductor protecting.
- 4.Printer temperature compensating circuit. Player Driver
- 5.Telecom exchanger
- 6.DC/AC transformer and HIC over heat protecting.

Negative temperature coefficient thermistor, also known as NTC thermistor, is a kind of sensor resistance whose resistance value decreases with the increase of temperature. Widely used in various electronic components, such as temperature sensors, resettable fuses and self-adjusting heaters, etc.
