

10*38mm Glass Fuse Tube 60A 80A 20A 100A 32V Gold Plated Glass Fuse

Our Product Introduction

for more products please visit us on lk-thermistor.com

Basic Information

- Place of Origin: China DongGuang
- Brand Name: LinKun
- Certification: UL ROHS
- Model Number: 10*38 Series
- Minimum Order Quantity: 1000PCS
- Price: Negotiation
- Packaging Details: 1000PCS/Bag
- Delivery Time: 5-7 days
- Payment Terms: L/C, D/A, D/P, T/T, Western Union
- Supply Ability: 100,000 pieces/month

Product Specification

- Axial Leads: Tin-plated Copper Wires
- Operating Temperature: -55 To +125
- Main Characteristics: Miniature Cartridge Fuse; Fast-Acting(F)
- Rated Current: 100A
- Storage Conditions: +10 To +60
- Fast Acting: Glass Tube
- Rated Voltage: 32 48 72V V
- Use: Car
- High Light: 10*38mm Glass Fuse Tube 60A 80A 20A 100A 32V Gold-Plated Glass Fuse
- Highlight: **60A Glass Fuse Tube,**
Gold Plated Glass Fuse Tube,
Glass Fuse Tube 32V

CURRENT FUSE

FUSE LINK AND FUSE BASE

Miniature Cartridge Fuse

The Miniature Cartridge Fuse is a type of electrical fuse that is designed to protect electrical circuits from overloading and short circuits. It is a tiny and compact fuse that is suitable for use in a variety of electronic and electrical devices.

Product Overview

The Miniature Cartridge Fuse is a high-quality fuse that is known for its reliable performance and durability. It is designed to withstand extreme temperatures and provide effective protection for your electronic devices. With its compact size and efficient design, this fuse is a popular choice among manufacturers and consumers alike.

Key Features

Tiny Cartridge Fuse: The Miniature Cartridge Fuse is a small and compact fuse that is ideal for use in tight spaces and small electronic devices.

Micro Cartridge Fuse: This fuse is designed to be micro-sized, making it suitable for use in miniature electronic devices.

Mini Cable Fuse: The Miniature Cartridge Fuse is also known as the Mini Cable Fuse, as it is commonly used in small electronic devices and cables.

Electrical Fuse: This product is an electrical fuse, which means it is designed to protect electronic circuits from overloading and short circuits.

Compact Fuse: The compact design of this fuse makes it an ideal choice for use in compact electronic devices.

Product Specifications

Operating Temperature: -55 To +125

Rated Current: 250mA-16A; 12.5A-16A; 1A-15A

End Caps: Nickel-plated Brass

Storage Conditions: +10 To +60

Rated Voltage: 250V AC

Application

The Miniature Cartridge Fuse is suitable for use in a wide range of electronic devices such as televisions, computers, printers, cameras, and more. It is also commonly used in small household appliances and automotive electronics.

Conclusion

The Miniature Cartridge Fuse is a reliable and efficient electrical fuse that offers effective protection for your electronic devices. Its compact size and efficient design make it a popular choice for manufacturers and consumers looking for a high-quality fuse. With its wide range of applications and durable performance, this fuse is a must-have for any electronic device.

Features:

- Tiny Size Cartridge Fuse
- Miniature Cartridge Fuse
- Fast-Acting Fuse
- Micro Glass Tube Fuse
- Nickel-plated Brass End Caps
- IEC 60127-2/ Standard
- GB/T9364.7 Standard
- Tin-plated Copper Axial Leads

Technical Parameters:

Standard	Rated Voltage
IEC 60127-2/	250V AC
GB/T9364.7	250V AC
Rated Current	Operating Temperature
250mA-16A	-55 To +125
12.5A-16A	-55 To +125
1A-15A	-55 To +125
Storage Conditions	End Caps
+10 To +60	Nickel-plated Brass
Fast acting	Axial Leads
Glass Tube	Tin-plated Copper Wires
Main Characteristics	
Small Fuse Cartridge	
Micro Cartridge Fuse	
Micro Cartridge Fuse Quick Blow	

Applications:

Miniature Cartridge Fuse - LinKun

Brand Name: LinKun

LinKun is a leading manufacturer of high-quality electrical fuses, specializing in tiny cartridge fuse products. With over 10 years of experience in the industry, our brand has become synonymous with reliability and safety.

Model Number: 521 527 511 Series

The Miniature Cartridge Fuse by LinKun comes in three different models - 521, 527, and 511 series. Each series offers different current ratings and sizes to cater to a variety of electronic devices.

Place of Origin: China DongGuang

All of our Miniature Cartridge Fuses are proudly made in our state-of-the-art factory in DongGuang, China. We adhere to strict quality control standards to ensure that every product meets our high standards.

Operating Temperature: -55 To +125

Our Miniature Cartridge Fuses are designed to withstand extreme temperatures, ranging from -55 to +125 . This makes them suitable for use in a wide range of environments, from industrial to automotive applications.

Axial Leads: Tin-plated Copper Wires

The Miniature Cartridge Fuse features axial leads made of high-quality tin-plated copper wires. This ensures excellent conductivity and durability, making our fuses a reliable choice for overcurrent protection.

Fast Acting: Glass Tube

The Miniature Cartridge Fuse uses a glass tube as its main body, which provides fast-acting protection against overcurrent. This makes it suitable for use in sensitive electronic devices that require quick response time.

End Caps: Nickel-plated Brass

To ensure a secure and stable connection, the Miniature Cartridge Fuse is equipped with nickel-plated brass end caps. This also enhances the durability and reliability of our fuses.

Standard: IEC 60127-2/ ; GB/T9364.7

Our Miniature Cartridge Fuses comply with international standards such as IEC 60127-2 and GB/T9364.7, ensuring that they meet the highest safety and quality requirements. This makes them a trusted choice for electronic devices worldwide.

Application and Scenario

The Miniature Cartridge Fuse by LinKun is a critical component in electronic devices that require overcurrent protection. It is widely used

in a variety of industries, including automotive, telecommunications, consumer electronics, and industrial equipment.

For example, in an automotive scenario, our Miniature Cartridge Fuse can be found in the fuse box of a car, protecting various electrical components from overcurrent. In a telecommunications setting, it is used to protect sensitive equipment such as routers and switches. In consumer electronics, it is commonly used in power adapters and chargers to prevent damage to the device.

The tiny size of our Miniature Cartridge Fuse makes it ideal for use in compact electronic devices. Its fast-acting feature ensures quick response time, providing reliable protection for delicate components. Its wide operating temperature range makes it suitable for use in extreme environments, providing peace of mind for users.

Conclusion

In conclusion, the Miniature Cartridge Fuse by LinKun is a top-of-the-line product that offers superior overcurrent protection for electronic devices. With its high-quality construction, compliance with international standards, and wide range of applications, it is the go-to choice for customers looking for reliable and efficient fuse solutions.

To learn more about our Miniature Cartridge Fuse and other products, please visit our website or contact us directly. We are committed to providing the best products and services to our customers, and we look forward to working with you!

Customization:

LinKun Miniature Cartridge Fuse Customization Service

Thank you for choosing LinKun as your partner for customized miniature cartridge fuse solutions. Our Miniature Cartridge Fuses are designed to meet your specific needs and provide reliable protection for your electronic devices.

Brand Name: LinKun

As a trusted brand in the industry, LinKun is committed to providing high-quality and customized solutions for Miniature Cable Fuse, Tiny Cartridge Fuse, and Micro Cartridge Fuse.

Model Number: 521 527 511 Series

Our Miniature Cartridge Fuses come in various models including 521, 527, and 511 series, each designed to meet different requirements and specifications.

Place of Origin: China DongGuang

All our Miniature Cartridge Fuses are proudly made in China, specifically in DongGuang, a city known for its advanced technology and efficient production processes.

Operating Temperature: -55 To +125

Our Miniature Cartridge Fuses are designed to withstand extreme temperatures ranging from -55 to +125, ensuring reliable performance in any environment.

Rated Current: 250mA-16A; 12.5A-16A; 1A-15A

We offer a wide range of rated currents for our Miniature Cartridge Fuses, including 250mA-16A, 12.5A-16A, and 1A-15A, to suit different applications and requirements.

End Caps: Nickel-plated Brass

Our Miniature Cartridge Fuses are equipped with nickel-plated brass end caps, providing excellent conductivity and corrosion resistance.

Rated Voltage: 250V AC

With a rated voltage of 250V AC, our Miniature Cartridge Fuses offer reliable protection for your electronic devices against overcurrent and short circuit.

Axial Leads: Tin-plated Copper Wires

Our Miniature Cartridge Fuses feature tin-plated copper wires for axial leads, ensuring efficient current flow and superior durability.

At LinKun, we understand the importance of tailored solutions for your specific needs. Contact us today to learn more about our Miniature Cartridge Fuse Customization Service and how we can help you. Choose LinKun for reliable, high-quality, and customized miniature cartridge fuse solutions.

Packing and Shipping:

Miniature Cartridge Fuse Packaging and Shipping

Our Miniature Cartridge Fuse is carefully packaged and shipped to ensure safe delivery to our customers. Here is the packaging and shipping process:

Packaging

Each Miniature Cartridge Fuse is individually wrapped in protective plastic packaging to prevent any damage during shipping. The fuses are then placed in a sturdy cardboard box, with appropriate cushioning materials to prevent movement and protect against impact. The box is sealed and labeled with the necessary information for identification.

Shipping

Once packaged, the Miniature Cartridge Fuses are shipped using reputable and reliable shipping companies. We offer various shipping options, including standard, express, and expedited shipping, to accommodate the needs of our customers.

For international shipments, the necessary customs forms and documents are included to ensure a smooth delivery process.

We also provide tracking information for all orders so that customers can easily track their shipment and know when to expect their Miniature Cartridge Fuses.

Conclusion

At Miniature Cartridge Fuse, we take great care in packaging and shipping our products to ensure they arrive in perfect condition for our customers to use. We are committed to providing a reliable and efficient delivery service to meet the needs of our customers.

FAQ:

Q: What is the brand name of this product?

A: The brand name of this product is LinKun.

Q: What is the model number of this product?

A: The model number of this product is 521 527 511 Series.

Q: Where is this product manufactured?

A: This product is manufactured in China DongGuang.

Q: What type of fuse is this?

A: This is a miniature cartridge fuse.

Q: What is the rated voltage of this fuse?

A: The rated voltage of this fuse is typically 250V.

Q: Can this fuse be used in both AC and DC circuits?

A: Yes, this fuse can be used in both AC and DC circuits.
